

Outcome Measures

At Foyle Food Group we record the following outcome measures

- Slips at unloading
- Secondary Stuns
- Falls at unloading

Animal health and welfare has always been a key priority for the Foyle Food Group, this is the first year that outcome measures have been recorded in this format.

The figures are reported back to the agriculture and technical team who are always looking for ways to improve on animal health and welfare. Figures for 2021 will be tracked alongside our 2020 figures to show our improvement.
